As a Full Stack Developer, I incorporate my experience with systems to deliver innovative solutions for end users. I'm fascinated by the creative process. It's truly magical to create something from nothing, to use words and symbols to bring people's ideas to life. I enjoy learning and problem solving, and want to use my talents to impact people's lives in a positive way.

SKILLS

HTML5+CSS3+Javascript, jQuery, Bootstrap, Materialize, React, Redux, Node, Express, Django, Postgresql, MongoDB

INDUSTRY EXPERIENCE

WEB DEVELOPMENT IMMERSIVE, GENERAL ASSEMBLY, Seattle, WA (Jan 2018–April 2018)

Project 1 - Fuzzy-Winner (working title) - HTML5 Canvas Game, where users clean up after their dog.

Project 2 - EIE.io Backyard Garden App - Express/Node/Postgres, allows users to create and track garden activities.

Project 3 - TaskMaster - React/Redux - Project Management Tool, allows users to create and track project activities.

Project 4 - TBEY - Django/Python - Online Store, allows users to create a vendor account and/or order products.

Edmonds Community College, Lynnwood, WA (June 2010 - Jan 2018)

Learning Support Systems Administrator (Canvas by Instructure)

- Created and maintained Javascript and Cascade Style Sheets (CSS) files used for college branding and DOM manipulation.
- Integrated and managed Learning Tool Interoperability (LTIs); such as, Panopto, McGraw Hill, Google Apps, EvaluationKit, and other third party solutions.
- Created, managed and problem-solved user account and course issues.
- Performed quarterly system configuration and course shell management.
- Provided course and user analytics and reporting for investigations.

Student Gmail / G Suite Systems Administrator

- Managed and created user accounts and troubleshoot account issues.
- Monitored and responded to suspicious account activity reports.
- Established Student Chromebook Lab (35 devices) and integrated with college Gmail (G Suite) domain, allowing admin access for device management through the Gmail administrator dashboard.

Student Technology Advice & Resource Team (START) Program Coordinator

- Conceived, procured funding for, implemented and managed student help desk that became institutionalized after the initial pilot phase.
- Maintained budgets, created operational procedures, oversaw development of knowledge base for student body.
- Recruited, trained and mentored student employees and volunteers.
- Partnered with and reported to Student Executive Board, Instructional Leadership, and Information

Technology Director on project outcomes.

Business Systems Analyst

- Conducted interviews with end users to gather system requirements, created system models, business process diagrams, and system requirements documentation.
- Performed a Gap Analysis on an in-house application and produced a report on findings.

..... **WORK EXPERIENCE**

National Subject Matter Expert - Global Property & Administration Department,

Mercer, Seattle, WA (Oct 1999 - May 2009)

- Project Manager and System Administrator for Events Management Software (EMS) Software in multiple offices across the US and Canada.
- Implemented and coordinated activities for the West Coast Business Continuity and Emergency Plans.
- Managed and supported Ergonomics, Facilities, Safety, Security, and other Real-estate Projects both locally and nationally.
