As a Full Stack Web Developer, I incorporate my experience with systems to deliver innovative solutions for end users. I'm fascinated by the creative process. It's truly magical to create something from nothing, to use words and symbols to bring people's ideas to life. I enjoy learning and problem solving, and want to use my talents to impact people's lives in a positive way.

SKILLS

HTML5+CSS3+Javascript, jQuery, Bootstrap, Materialize, React, Redux, Node, Express, Django, Postgres, MongoDB

INDUSTRY EXPERIENCE

PROJECTS

EIE.io Garden App - (Postgres/Express/Node), Backyard Garden Activity Tracker.

- Deployed on Heroku, learned about the Sequelize ORM (models and migrations), axios and APIs

TaskMaster - MERN STACK (Mongo/Express/React+Redux/Node), Project Management App.

- Learned about GitHub collaboration with this group project, worked with MongoDB and React Router

TBEY - (Postgres/Django/Python), eCommerce Site.

- Deployed on Heroku, experimented with context-processors to provide user cart for orders.

EDMONDS COMMUNITY COLLEGE, Lynnwood, WA (June 2010 - Jan 2018)

Learning Management Systems (LMS) Administrator, Canvas by Instructure - (3 years)
